## APPLICATIONS

- » **Monitoring, Mixing and Mastering**

The K553 PRO's are closed-back, over-ear studio headphones for monitoring, mixing and mastering. Their unique performance results from the perfect balance between the noise-isolating qualities of a closed-back headphones and the spacious, dimensional sound of an open-back design. The 50mm drivers provide a strong, yet accurate and distinguished bass response as needed for monitoring and mastering contemporary music. The extra large, soft ear pads ensure stress free listening over hours and the 2D-axis mechanism enables full flat folding for easy storage or handling on the road. With its low impedance drivers the K553 PRO is sensitive enough to also be used on laptops and mobile devices, which is why its soft high quality cable is equipped with a 3.5mm (1/8") plug. A screw on adapter to 6.3mm (1/4") is included.
