

HARMAN KARDON® HEADPHONES **AE**

Introducing the AE model in-ear headphones, part of the first-ever line of Harman Kardon® headphones. Blending sophistication and simplicity, acoustics and aesthetics, AE headphones embody the essence of “Beautiful Sound.”

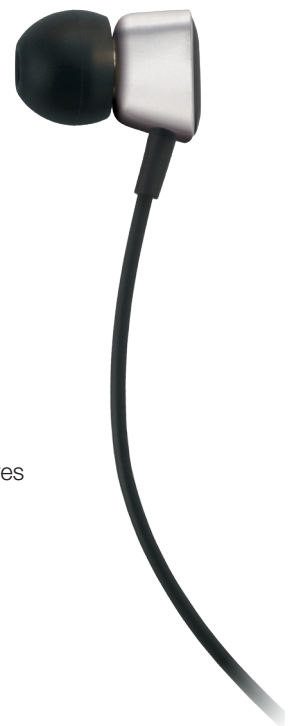

Beautiful sound. To go.

Drawing from a rich heritage of acoustic innovation, Harman Kardon® AE headphones feature an aluminum-alloy housing for extended bass and true low-frequency reproduction. Optimized 3/8-inch (9-millimeter) drivers deliver extended bass response, wide dynamic levels, high sound-pressure levels and sonic clarity at all volume levels. The in-ear headphones include silicone sleeves in three sizes for optimum comfort and an Apple three-button remote with built-in microphone for phone calls. Lightweight and comfortable, AE headphones let you take Beautiful Sound with you wherever you go.

From high-quality materials to exceptional acoustic performance, these new headphones reflect the Harman Kardon commitment to innovative industrial design and uncompromising sound quality.

Highlights

- Sophisticated, modern design
- Optimized driver system
- Aluminum alloy housing
- Sonic clarity and accuracy even at low volume levels
- Silicone sleeves and Comply™ foam sleeves
- Apple three-button remote with built-in microphone
- Heavy cable and durable plug

KEY FEATURES

HARMAN KARDON® HEADPHONES AE

A triumph of craftsmanship and audio engineering, Harman Kardon headphones are designed for those with an eye for style and an ear for sound.

Sophisticated, modern design

Harman Kardon AE headphones offer high-tech performance wrapped in an elegant package and interface. With their blend of aluminum and black, the AEs' design and function complement Apple products while reinforcing the sophisticated elegance of the Harman Kardon brand.

Optimized driver system

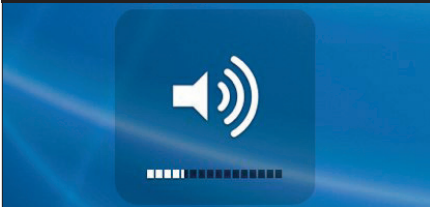

Premium 3/8-inch (9-millimeter) drivers generate an excellent frequency response (16Hz – 20kHz) and are optimized to the aluminum housing. They produce wide dynamic range, high sound-pressure levels and extended bass response.

Aluminum alloy housing

The housing on the AE headphones is made of an aluminum alloy that provides superior acoustic dampening. It extends the bass range with true low-frequency reproduction. The housing also reduces the unwanted resonances that can compromise sound quality.

Sonic clarity and accuracy even at low volume levels

The AE headphones' acoustic engineering and passive noise reduction mean that you can hear music and other audio content clearly at low volume levels, so you can enjoy all the music definition without all the volume – and that's safer for your ears.

Silicone sleeves

Three pairs of sleeves (small, medium and large) are included. The choice of size ensures maximum comfort – and minimum ambient noise – in the ear canal.

Comply™ foam sleeves

As a one-size-fits-all alternative to silicone sleeves, AE headphones also include a pair of Comply™ sleeves. The moldable foam provides a comfortable fit as well as noise reduction.

Apple three-button remote with built-in microphone

Made specifically for use with iPhone and iPod, the streamlined AE remote offers familiar controls for audio playback and phone calls.

Heavy cable and durable plug

The cable on the AE headphones features a metal plug, and the elastomer-coated cable resists tangling. High-quality materials help the cable and plug last longer.

Premium carrying case

Beautiful sound is worth protecting. AE headphones come with a carrying case that keeps the silicone sleeves from getting lost and reduces cable tangling.
