

THE JBL ON STAGE® MICRO portable docking sound system is the perfect travel partner for your iPod. Imagine the convenience of taking the JBL On Stage Micro system on the road or enjoying the sound anywhere you happen to be. Connected to your iPod, iPhone, MP3 player, PC or other music source, it produces clean, powerful sound. It charges your iPod and also provides a USB pass-through to connect to your computer. With the JBL On Stage Micro system's IR remote, you can take complete control of your digital music experience.

JBL ON STAGE®* MICRO PORTABLE LOUDSPEAKER DOCK FOR iPod

JBL ON STAGE^{®*} MICRO

PORTABLE LOUDSPEAKER DOCK FOR iPod

COMPATIBILITY The JBL On Stage Micro system is compatible with all docking versions of the iPod and iPhone. A stereo mini jack connection also allows you to enjoy high-quality audio from a variety of other devices, such as MP3 and CD players, desktop computers (all platforms), satellite radio and laptops.

EASY-TO-USE MUSIC AND NAVIGATION CONTROLS Just a touch of the music controls increases or decreases the volume. Browse songs, photos and playlists, change tracks and settings and more, using the navigation controls. With the JBL On Stage Micro IR remote, you have complete control of your iPod, as if it were in your hand.

CONNECTION VERSATILITY The JBL On Stage Micro loudspeaker dock is a multimedia focal point. Enjoy your iPod, view photos or videos, and listen to virtually any other auxiliary audio component, all through the JBL On Stage Micro system. Connect the USB cable to your computer for full iPod and iTunes compatibility.

ADDITIONAL FEATURES

IR remote – The JBL On Stage Micro IR remote has several modes of operation. The Music mode allows you to control the volume, change tracks, fast forward and fast reverse. The Navigation mode allows you to navigate the menus on your iPod just as if you were touching the iPod itself. You can navigate your music, watch your slideshows, and find and play your videos.

OnePoint design – The OnePoint design provides the connection to your computer. Connect a USB cable to the rear of the unit and every time you dock your iPod, you will have a connection for synchronizing and charging.

Evercharge topology – The JBL On Stage Micro system charges your iPod, even when not connected to the computer or if the system is off.

ADVANCED TECHNOLOGY The JBL On Stage Micro loudspeaker dock combines many proprietary technologies to produce the highest quality audio – astonishing bass and clear, accurate sound from any direction.

Odyssey[®] transducers – The Odyssey drivers provide accurate high frequencies while also being capable of low-frequency extension of four octaves, unlike traditional powered tweeters. Enjoy full, rich frequency response from low bass to the highest highs.

Slipstream port design – The port minimizes boundary layer separation, for high-output bass with low distortion.

COE (Computer-Optimized Equalization) – The JBL On Stage Micro system equalization is computer-optimized, resulting in a rich, complete soundstage over a wide range of listening positions.

OCT (Optimized Compression Topology) – The system utilizes a proprietary compression technology to ensure clean, accurate sound at high output levels.

AEMS (Advanced Energy Management System) – The JBL On Stage Micro system has an automatic battery-saving shutoff. The AEMS will automatically put the system into sleep mode when there is no audio input. The system awakens with just a touch and resumes at the same volume level.

Battery-powered – The JBL On Stage Micro loudspeaker dock is designed to use most types of AAA batteries. Four fresh AAA batteries allow up to 24 hours of continuous play at normal listening levels. An amber LED flashes when the battery protection circuit senses that the batteries are low. The use of rechargeable batteries (e.g., NiMH) is encouraged, to reduce waste and help the environment.

DETAILED TECHNICAL SPECIFICATIONS

Manufacturer:	JBL, Inc.
Model:	JBL On Stage [®] Micro
Available in:	Black and Silver
Input Requirement:	Main connection – docking connector for iPod Auxiliary connection – 1/8" (3.5mm) stereo mini jack
Drivers:	Two Odyssey [®] transducers
Power:	2 x 3 Watts
Frequency Response:	70Hz – 20kHz
Dimensions:	Width – 6" (150mm) Height – 1-3/4" (38mm)
Weight:	1 lb (0.5kg)
Input Impedance:	>10k Ohms
Signal-to-Noise Ratio:	>85dB
Voltage Input:	120V AC U.S., 100V AC Japan, 230V AC Europe
