Power for the digital revolution.™

Introducing Take Control™

Take Control is the first high-performance touchscreen system controller. Take Control is intelligently designed to integrate, simplify and organize all your home electronics.

Control multiple devices (components) from a single screen

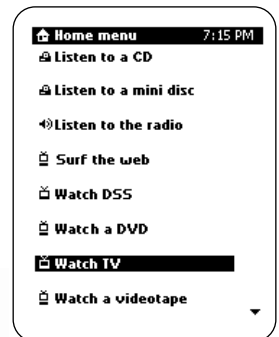

Take Control allows you to control multiple devices/components from a single screen. The intuitive Setup Wizard allows you to get started quickly by adding devices (receiver, TV, VCR, satellite dish, etc.) to your Take Control in seconds! Add up to 15 devices. It's a true "system controller."

Activity screen

Create an Activity screen, such as "Listen to a CD" or "Watch a DVD."

Notice how Take Control places the buttons most often used at your fingertips.

Learn other remotes

Take Control is obsolescence-proof and expands as your home theater grows.

Easily add new devices using the Setup Wizard, or teach Take Control new devices with the convenient "learning" feature.

The Take Control Editor

Enables you to further customize Take Control from your PC, giving you the power to customize activities and buttons or create powerful macros.

Take Control is simple to use and gives you the power to customize your system to your needs.
