

Hear the truth™

JBL® CINEMA SB 100

Plug-and-play 60-watts soundbar with HARMAN Display Surround

LEGENDARY SOUND SINCE 1946

RAISING THE BAR
FOR TV SOUND.

The JBL® Cinema SB 100 is a complete, integrated soundbar system that dramatically improves the sound reproduction of televisions. The two-channel soundbar is a plug-and-play solution incorporating two three-inch woofers, two 1-1/2-inch tweeters, electronics and amplifiers in a single, stylish enclosure. Designed to complement flat-panel televisions up to 32 inches, the Cinema SB 100 is ideal for people who want affordable, premium sound quality in a nonintrusive, easy-to-install solution. It can be mounted on a wall or placed on a shelf, and includes an equalization switch that optimizes the tonal quality for either placement. It features HARMAN Display Surround, a bass boost function, analog and optical digital audio inputs – plus a subwoofer output for those who want to add an external subwoofer.

Highlights

- Plug-and-play solution
- Central, powered soundbar speaker
- Analog and optical digital audio inputs
- Exclusive HARMAN Display Surround
- Bass boost
- Dual-position equalization
- Subwoofer output
- TV-volume “learning” capability

Finish: 

KEY FEATURES

JBL® CINEMA SB 100

Hear the truth™

Surround sound from a single soundbar? That's not magic, that's engineering.

Central, powered soundbar speaker

The Cinema SB 100 incorporates left-and-right woofers and tweeters, amplifiers and controls into a single soundbar. Its built-in amplification simplifies system connections and operation.

Analog and optical digital audio inputs

The Cinema SB 100 features enough inputs to connect a TV and disc player, satellite tuner or cable tuner to the system. It connects directly to any television and increases convenience – no plugging-in or unplugging required.

Exclusive HARMAN Display Surround

Drawing from HARMAN expertise in movie theater audio, the Cinema SB 100 lets you add cinema sound without adding multiple speakers. Employing proprietary HARMAN Display Surround technology, it creates a virtual surround-sound experience for multiple listeners from a single soundbar.

Bass boost

JBL is known for exceptional bass response, and the Cinema SB 100 lets you increase low-frequency performance at the touch of a button on the included remote. The added bass impact is ideal for films.

Dual-position equalization

The Cinema SB 100 can either be placed on a shelf or tabletop, or wall-mounted with included hardware. A dual-position equalization feature optimizes the soundbar's performance for either placement, so you can position it where you choose without compromising sound quality.

Subwoofer output

The Cinema SB 100 offers an impressive audio upgrade for your TV – especially for the price. But if you want even more authoritative bass performance, it's equipped with full-range mono RCA output so you can easily add a powered subwoofer.

TV-volume "learning" capability

The Cinema SB 100 comes with a credit-card-sized remote, but you might not need to use it much. That's because the SB 100 can "learn" the volume control IR code of your existing TV remote control, so you can control the soundbar and TV volume with the same remote.

SPECIFICATIONS

JBL® CINEMA SB 100

Hear the truth™

Upgrade your TV sound with a single, stylish soundbar.

What's included:

- 1 Cinema SB 100 System
- 1 IR remote control
