loudspeaker dock for iPod®, *with remote!*

# jbl on stage™\* II

loudspeaker dock for iPod®, *with remote!*

JBL On Stage II, a compact, high-performance sound system, is a revolution in personal sound for all iPod players. Connected to your iPod, MP3 player or other music source, JBL On Stage II will provide clean, powerful sound. The wireless RF remote control provides the freedom to enjoy your music from across the room or in another room, or outside, from up to 50 feet. Play, pause, forward track and reverse track...all at your finger tips. A simple press will increase or decrease volume, mute and more. A convenient clip keeps the remote handy, as you move about your environment.

**Compatibility** JBL On Stage II incorporates the Apple® iPod Universal Dock adapter and is compatible with most docking versions of iPod, including nano and 5G versions. A stereo mini jack connection also allows you to enjoy high-quality audio from a variety of other devices such as MP3 and CD players, desktop computers (all platforms) and laptops.

**Easy-to-Use Touch Controls** Touch Volume Control – Just a touch increases or decreases the volume. A touch on both pads mutes or un-mutes the system. JBL On Stage II also remembers your last volume setting even after the system shuts down.

**Transportable** Bring your JBL On Stage II on the road for great sound wherever you go. The lightweight, compact sound station can provide full, rich sound in any location.

**Additional Features** *OnePoint Design* – The OnePoint iPod connectors provide the connection to your computer. Connect the standard iPod cable to the back of the JBL On Stage II, and every time you dock your iPod, you will have a connection for synchronizing.

*Evercharge Topology* – JBL On Stage II provides power to charge your iPod, even when it's not connected to the computer, or the system is off.

An auxiliary audio input cable is also included. The surface-gripping rubber feet provide a stable platform on most surfaces.

**Advanced Technology** JBL On Stage II combines many proprietary technologies to provide the highest quality sound. It will provide astonishing bass and clear, accurate sound.

*Odyssey® Transducers* – The four aluminum-domed transducers are driven by powerful neodymium magnets. This design provides a full, rich frequency response, from the lowest bass to the highest highs.

*COE (Computer-Optimized Equalization)* – System equalization is computer-optimized to provide a rich, complete soundstage.

*OCT (Optimized Compression Topology)* – JBL On Stage II utilizes a proprietary compression technology to ensure clean, accurate sound at high output levels.

## Technical Specifications

Manufacturer:	JBL, Incorporated
Model Name:	JBL On Stage II
Available in:	White With Flint Gray
Input Requirement:	Main connection – iPod docking connector Auxiliary connection – 1/8" (3.5mm) mini stereo jack
Drivers:	Four Odyssey neodymium drivers
Power:	6 Watts per channel
Frequency Response:	80Hz – 20kHz
Dimensions:	Diameter – 7" (175mm) Height – 2" (50mm)
Weight:	1 lb (450g)
Input Impedance:	>5k ohms
Signal-to-Noise Ratio:	>80dB
Voltage Input:	120V AC US 100V AC Japanese 230V AC Europe
