A HERITAGE OF EXCELLENCE.

The road to Primus stretches back more than 30 years — a road lined with literally dozens of audio milestones.

With innovative technologies, materials and manufacturing techniques, Infinity has advanced the science of sound year after year.

Primus Series speakers benefit from every Infinity innovation that has ever come before. They also embody everything we've learned about making captivating sound affordable.

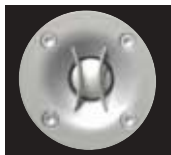

Infinity's flagship system, the Prelude MTS.

ONE BREAKTHROUGH DESERVES ANOTHER.

Infinity's critically acclaimed Prelude™ MTS introduced a revolutionary transducer technology that dramatically reduced distortion to produce a more natural, detailed sound.

That patented advance led directly to Infinity's new Metal Matrix Diaphragm (MMD™) technology. Used throughout the Primus Series, MMD transducers deliver crystal-clear, distortion-free sound from dynamic digital sources, even at high listening levels.

The MMD tweeter and waveguide deliver wider, more even high-frequency response.

THE MMD™ DIFFERENCE.

Unlike the paper, polypropylene or Kevlar® cones found in similarly priced speakers, MMD cones consist of a stiff aluminum core, anodized on both sides for increased strength and rigidity.

The result is extremely fast, extremely accurate transducers, producing a distinctly cleaner, more realistic sound.

MUSIC? OR MOVIES? OR BOTH?

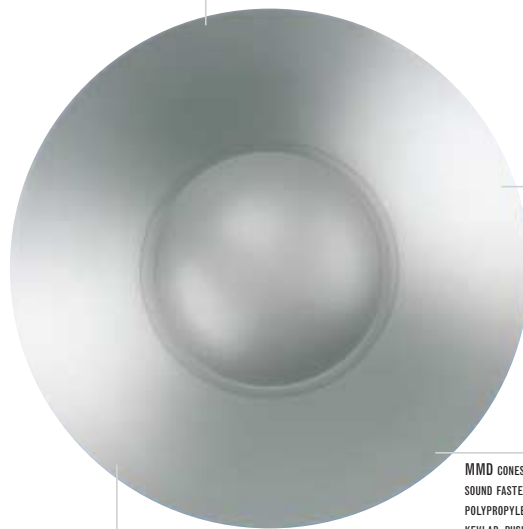

From unobtrusive bookshelf music systems to dazzlingly powerful home theaters, there's a Primus system that's right for every purpose and room in your home. Infinity also offers three powered subwoofers to perfectly complement your Primus speakers. A recommended addition to any system, these three subs allow you to duplicate the cinematic experience at home.

Add the PS-8, PS-10 or PS-12 powered subwoofer for incredible music and home theater realism.

STIFFER, LIGHTER, STRONGER. THE MMD CONE IS SUPERIOR TO OTHER COMMONLY USED MATERIALS IN VIRTUALLY EVERY PERFORMANCE CHARACTERISTIC.

HIGHLY EVOLVED. PRIMUS MMD CONES ARE DERIVED FROM THE SAME TECHNOLOGY USED IN INFINITY'S FLAGSHIP PRELUDE MTS.

The Infinity Metal Matrix Diaphragm

MMD CONES. THEY CONDUCT SOUND FASTER THAN PAPER, POLYPROPYLENE AND KEVLAR, PUSHING UNWANTED RESONANCES BEYOND THE OPERATING RANGE OF THE TRANSDUCER.

PERFORMANCE THAT'S PURE INFINITY.

Sound that commands your focused, undivided attention, transforming the act of listening from a passive pursuit to an engaging endeavor. That's the heritage of Infinity — and the promise of Primus.

Five-way binding posts provide secure connection and easy setup.

A NEW BENCHMARK FOR VALUE.

Primus is designed to deliver a listening experience unlike anything in its price class, but Infinity confidently encourages you to reach your own conclusion.

We had no idea

how much we'd been missing all these years
