

Hear the truth™

JBL® CHARGE

10-watt portable stereo speaker with a high-capacity 6,000mAh Li-ion rechargeable battery, a built-in bass port and wireless *Bluetooth*® connection

LEGENDARY SOUND SINCE 1946

THE UNBEATABLE PORTABLE.

Introducing the JBL® Charge stereo speaker that provides more than 12 hours of playback time from a single charge of its built-in, high-capacity 6,000mAh Li-ion (lithium-ion) rechargeable battery. It can even charge your other mobile devices on the go with its built-in USB port.

The JBL Charge speaker wirelessly streams audio from any *Bluetooth*®-equipped smartphone or tablet, and lets you enjoy unsurpassed portable-audio performance from your mobile devices and tablets. With two 1-5/8-inch (38mm) drivers, a built-in bass port, 2 x 5 watts of amplification and digital signal processing, it delivers full-range JBL sound with exceptional bass. Ideal for active, outdoor lifestyles, the portable JBL Charge speaker fits into a backpack and plays from either a vertical or horizontal position, so you can use it just about anywhere. The JBL Charge stereo speaker is a portable audio powerhouse for any environment.

- Digital signal processing
- More than 12 hours, 6,000mAH Li-ion rechargeable battery
- USB recharging for external devices
- Versatile, portable design
- LED indicator

Finishes:   

KEY FEATURES

JBL® CHARGE

Hear the truth™

Big sound, long battery life and a powerful charging station for devices.

The JBL Charge speaker delivers more performance, yet costs less, than competitive portable speakers.

So you can enjoy both the full-range JBL® sound and a remarkable audio value.

Bluetooth® technology

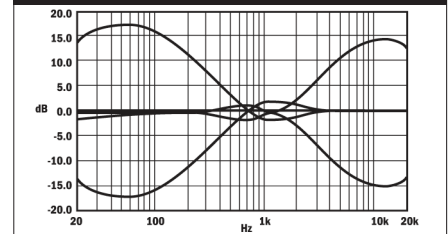

The JBL Charge portable speaker streams stereo music wirelessly from any *Bluetooth*®-equipped device, making JBL sound available for a wide range of portable devices, including tablets.

Built-in bass port

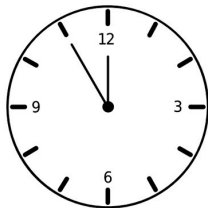

Some portable speakers produce less-than-impressive bass. Not the JBL Charge. It has a built-in bass port, and generates bass that comparable portable products simply can't equal.

Digital signal processing

JBL has more than 60 years of expertise producing high-quality sound in venues around the world. The JBL Charge uses this expertise and employs digital sound processing to generate room-filling audio with great bass from a compact speaker.

More than 12 hours, 6,000mAh Li-ion rechargeable battery

The JBL Charge stereo speaker has a massive, built-in 6,000mAh Li-ion rechargeable battery that provides more than 12 hours of playback time. The battery is easily recharged using a USB port, which saves you battery hassles and money.

USB recharging for external devices

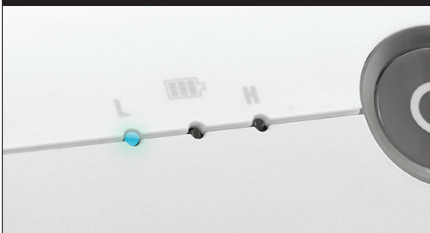

A USB port on the JBL Charge speaker lets you charge other USB devices right from the speaker. So you don't need an extra charger to keep your devices powered up.

Versatile, portable design

The JBL Charge stereo speaker plays from either a vertical or horizontal position, so you can place it in a variety of locations. And it fits easily into a backpack, so you can take it from one place to the next.

LED indicator

A clearly visible LED lets you know when the built-in Li-ion battery needs to be recharged, as well as when the JBL Charge is in *Bluetooth* listening or pairing mode.
