

AVR 1650

5.1-channel, 95-watt audio/video receiver with HDMI® v.1.4a with 3-D and Deep Color

As the perfect A/V receiver for budget-conscious film lovers and audiophiles, the Harman Kardon AVR 1650 has an impressive list of features designed to take your home entertainment to the next level. With all the latest Dolby® and DTS® audio modes and HDMI® v.1.4a with 3-D and Deep Color, the AVR 1650 lets you experience the next dimension in TV viewing – while Logic 7® processing creates an exhilarating 5.1-channel, 360-degree soundstage for your movies, TV shows and games. And with four HDMI inputs, extensive video and audio connectivity, and the ability to connect with The Bridge III for iPod/iPhone playback, the AVR 1650 gives you all the flexibility you need to configure your ideal home theater system.

Features	Advantages	Benefits
HDMI v.1.4a with 3-D and Deep Color	Plays 3-D home entertainment when used with 3-D TV and 3-D Blu-ray Disc™ player, cable or satellite source	Keeps you up to date with emerging home theater technologies
Powers your entire 5.1-channel surround-sound system	Five amplifier channels use a high instantaneous-current capability (HCC), ultrawide-bandwidth amplifier design for accurate, dynamic sound	Offers 95 watts of power per channel to create an emotionally charged home movie theater experience
Dolby TrueHD and DTS-HD Master Audio™ decoding	Delivers high-definition sound to match the high-resolution video when playing Blu-ray Disc recordings	Provides a superb surround-sound experience for multiple listeners
Logic 7 processing	Transforms movies, TV shows and ordinary stereo sources such as CDs and iPod devices into 5.1-channel surround sound – making listening fun	Creates a realistic 360-degree soundstage Supplies optimal sound for movies, music and games
The Bridge III connectivity (The Bridge III is optional)	Plays entertainment from your iPod and iPhone devices on your home theater system	Infinitely expands your home entertainment choices Achieves higher-quality sound than is possible on your computer It's convenient and easy to use
EZSet/EQ™ technology	Automatically tailors individual speaker volume levels and delay times for the specific room conditions	Elicits the best possible audio performance in your listening room Saves you money, since it does the job of an experienced technician
Dolby and DTS surround-sound decoding	Decodes all popular Dolby and DTS soundtracks, adding a new depth of sound to whatever you're watching	Adds a new dimension to the surround sound experience Lets you experience theater-quality sound
Four HDMI inputs	Offers extensive digital video connectivity with other systems so you can connect your whole system to the AVR 1650	Maximizes audio/video performance Reduces connection confusion
Three digital audio inputs, six analog audio inputs	Offers extensive audio connectivity and plenty of connections for your digital and analog source components	Expands your system with ease without requiring you to buy more components
Headphone jack with HARMAN headphone surround mode	Creates a realistic 5.1-channel surround-sound experience on a set of stereo headphones	Allows for private listening
Color-coded binding-post speaker connectors	Accepts a wide variety of speaker wires for flexibility and compatibility	Provides a secure connection Color coding helps prevent connection errors
Multidevice, programmable remote	Controls your entire audio/video system from a single remote	Simplifies your life Makes home entertainment easier to use
FM stereo/FM/AM tuner	30 preset stations let you instantly tune to your favorites	Convenience
Upgradeable firmware via USB port	Keeps your receiver's performance up to date	Easily upgrades your receiver for improved operation
