

# HARMAN KARDON® HEADPHONES **CL**

Introducing the CL model on-ear headphones, part of the first-ever line of Harman Kardon® headphones. Blending sophistication and simplicity, acoustics and aesthetics, CL headphones embody the essence of “Beautiful Sound.”

Beautiful sound. To go.

Harman Kardon® CL headphones feature an exclusive acoustic system that integrates superb mechanical design, materials and electronics. User-exchangeable bows, self-adjusting housings, soft leather cups and slow-retention ear-cup foam ensure a comfortable fit and an optimal acoustic seal around the ear. Uniquely baffled 1-5/8-inch (40-millimeter) drivers enable the CL to outperform other headphones in extended bass response. Lightweight and comfortable, CL headphones let you take Beautiful Sound with you wherever you go.

From high-quality materials to exceptional acoustic performance, these new headphones reflect the Harman Kardon commitment to innovative industrial design and uncompromising sound quality.

## Highlights

- Sophisticated, modern design
- Optimized driver system
- Sonic clarity and accuracy even at low volume levels
- Apple compatible remote with mic
- User-exchangeable metal bows
- Dual axis self-adjusting housings
- Slow-retention premium foam
- Closed back design

# KEY FEATURES

## HARMAN KARDON® HEADPHONES **CL**

A triumph of craftsmanship and audio engineering, Harman Kardon headphones are designed for those with an eye for style and an ear for sound.

### Sophisticated, modern design

Harman Kardon CL headphones offer high-tech performance wrapped in an elegant package and interface. With their blend of sandblasted steel and black matte housings, the CLs' design and function complement Apple products while reinforcing the sophisticated elegance of the Harman Kardon brand.

### Optimized driver system

High-performance 1-5/8-inch (40-millimeter) drivers produce an excellent frequency response (16Hz – 20kHz) for a natural tone. A unique baffle creates air flow that extends low frequencies. As a result, CL headphones provide better bass response than other headphones in their class.

### Closed back design

CL headphones incorporate the Harman Kardon closed-back design that keeps outside noise out while keeping your music from leaking out and distracting others. Which means your listening experience is undisturbed, immersive – and private.

### Sonic clarity and accuracy even at low volume levels

The CL headphones' acoustic engineering and passive noise reduction mean that you can hear music and other audio content clearly at low volume levels, so you can enjoy all the music definition without all the volume – and that's safer for your ears.

### User-exchangeable metal bows

To facilitate the optimal positioning of the ear cup on the head – and improve acoustic performance – CL headphones come with headband bows in two different sizes: small and large. Users can easily swap the headbands to determine which size maximizes comfort and fit.

### Self-adjusting housings

The rugged steel hinges connecting the CL's housings to its headband enable the housings to swivel in two dimensions. This structure maintains an ideal fit and acoustic seal around the ear, enhancing comfort and maximizing the rejection of outside noise for superior sound.

### Slow-retention premium foam

Premium foam in the ear pads contributes to the CL headphones' excellent passive noise reduction and extended bass response. The slow-retention foam helps maintain an acoustic seal around the ear, which keeps outside noises out and also keeps the listener's music from disturbing others.

### 2D folding mechanism and premium carrying case

The CL ear cups fold flat when they're not in use, making the headphones easier to transport and store. The flat-folding headphones and included carrying case slip easily into bags or briefcases – which makes the CLs especially convenient for travelers.

### Apple-compatible remote with mic

The CL headphones' cable integrates an Apple-compatible remote and microphone that let you accept and end phone calls without removing the headphones. Wrapped in tightly woven nylon fabric, the heavy-gauge cable resists tangling and includes highly finished connectors on both ends.
