JBL® TIM MCGRAW TMG81 HEADPHONES

High-performance, on-ear headphones

Sound matters to three-time GRAMMY®-winner Tim McGraw. And it certainly matters to JBL® engineers. So when the artist and engineers teamed up to design on-ear headphones, superior sound was no accident. The JBL Tim McGraw Artist Series headphones are voiced to deliver the realistic, flat frequency response music professionals demand. High-performance drivers reproduce your favorite music as the artist intended it to be heard, while the cushioned ear cups and comfortable headband enable hours of continuous listening. The lightweight TMG81s fold flat for easy transport, so you can take great JBL sound with you wherever you go.

SPECIFICATIONS
